PUBLICATIONS OF THE GEOLOGICAL SOCIETY OF AMERICA.

REGULAR PUBLICATIONS.

The Society issues a single serial publication entitled BULLETIN OF THE GEOLOGICAL SOCIETY OF AMERICA. This serial is made up of *proceedings* and *memoirs*, the former comprising the records of meetings, with abstracts and short papers, lists of Fellows, etc., and the latter comprising the longer papers accepted for publication. The matter is issued as soon as practicable after acceptance in covered brochures, which are distributed at once to Fellows and exchanges. Provision has not yet been made for sales.

Volume 1, covering the work of the Society from its organization to the end of 1889, is now complete. It comprises the following brochures:

IRREGULAR PUBLICATIONS.

In the interests of exact bibliography, the Society takes cognizance of publications issued either wholly or partly under its auspices. Each author of a memoir receives 30 copies, and is authorized to order any additional number at a slight advance on cost of paper and presswork; and these separate brochures are identical with those of the editions issued and distributed by the Society. Contributors to the proceedings also are authorized to order any number of separate copies at a slight advance on cost of paper and presswork; but these separates are bibliographically distinct from the brochures issued by the Society.

The following separates of parts of Volume 1 have been issued:
